JUNE 2025

Change Notification: BioClean™ BIOTAC Discontinuation & Alternative Gloves Recommendation

Dear Valued Customer,

Following our communication regarding the rationalization of BioClean™ BIOTAC gloves (Ref: LSCCN086.1), we would like to provide you with an important update and an additional recommended alternative to support your ongoing needs.

As part of Ansell's continuous product portfolio optimization, the BioClean™ BIOTAC gloves are being phased out. While the Nitrilite™ 93-401 was initially suggested as an alternative, we are pleased to also recommend the Kimtech™ G3 White Nitrile gloves as a suitable replacement. These gloves offer comparable protection, comfort, and performance, and are widely used in controlled environments.

Stock Availability & Transition Timeline

We currently have approximately six months of BioClean™ BIOTAC stock available to support your transition. We encourage you to begin alternative validation and transition planning as soon as possible to ensure continuity of supply.

Additional Recommended Alternative

Kimtech™ G3 White Nitrile Gloves

- ✓ Cleanroom-ready
- ✓ Powder-free, latex-free
- ✓ High tactile sensitivity and chemical splash protection

Please see the detailed specifications comparison of the gloves attached.

Your Ansell Sales Representative will be in touch shortly to assist with:

- ✓ Sample requests for Kimtech™ G3 White Nitrile gloves
- ✓ Technical specifications and validation support
- ✓ Transition planning and order management

We appreciate your continued trust in Ansell and are committed to supporting you through this transition.

Yours Sincerely,

Fiona Zwinkels-Stalker
Senior Marketing Director, EMEA/APAC
