Updated Ansell Pricing Effective April 2026

Dear Customer,

We would like to inform you that the prices of Ansell products will be updated as of April 2026. This adjustment is due to sustained increases in global raw-material, energy, and transportation costs, which are currently affecting the entire PPE industry and supply chain.

Ansell has worked to limit the impact of these changes by absorbing and managing cost fluctuations over recent weeks. However, given the continued volatility in several cost categories, an adjustment is now required to ensure the consistent production and availability of our products.

Your distributor will provide you with the updated prices applicable from the effective date. These adjustments reflect the current cost environment and will be monitored regularly as conditions evolve.

At the same time, we would like to highlight that market conditions currently remain dynamic, with increased demand and pressure across parts of the global supply chain. While all quantities committed under existing contracts and framework agreements continue to be fulfilled as planned, a significant increase in additional requests is being observed. To ensure continuity of supply for all customers, an allocation system may be implemented where required. Under this approach, customers may receive monthly volumes aligned with their historical consumption. This framework remains flexible and may be adjusted where specific circumstances require it.

Our teams are fully engaged, and while our intent is to remove this temporary measure as soon as conditions allow, global cost fluctuations often have a lagging effect. We will continue to review the situation closely and adjust or withdraw the surcharge when the underlying conditions improve.

We understand that pricing changes can affect your operations, and we remain committed to maintaining transparency and continuity of supply. If you have any questions, please contact your usual distributor representative.

Thank you for your understanding and continued trust in Ansell's products.

Sincerely,

Augusto Accorsi

Chief Commercial Officer EMEA/APAC
